

ATUL KUMAR JHA

SOFTWARE ENGINEER

+91-8750301588 | jhaak301@gmail.com | [Portfolio](#) | [Github](#) | [Linkedin](#)

EDUCATION

Bachelor of Technology (B.Tech) Dronacharya Group of Institutions	2021 - 2025 Greater Noida
Higher Secondary Education Navyug School	2019 - 2021 New Delhi

PROFESSIONAL EXPERIENCE

Blowtrumpet - Software Developer - Developed Tejaki/Revaki, a programmatic advertising platform with automated in-stream sponsorships, real-time overlays (<100ms), and integrated Twitch/YouTube OAuth and analytics. - Architected a Turborepo monorepo with Next.js and Nest.js services, implementing scalable microservices and Dockerized deployments behind an Nginx reverse proxy. - Reduced infrastructure costs by 30% through optimized containerization, CI/CD automation, and efficient service orchestration.	Dec 2024 - Present
Utopia Digitech PVT. LTD. - Internship - Utilized Figma, React, and API integration to support project operations. - Collaborated with developers to understand the application and create user manuals. - Assisted in API testing and issue resolution to improve functionality. - Produced detailed SRS (Software Requirements Specification) documentation for multiple projects.	Sep 2024 - Dec 2024

PROJECTS

Caption Tech Stack : Next.js, Tailwind CSS, TypeScript, Vercel - Developed a web application that enables users to upload video files (≤ 20 MB) and automatically generates captions/subtitles. - Designed a clean, responsive UI/UX with Tailwind CSS and drag-and-drop upload support. - Deployed on Vercel, demonstrating end-to-end development from build to production.	See Live
I-showspeed Tech Stack : Next.js, Tailwind CSS, TypeScript, Vercel - Built and deployed a publicly accessible live demo showcasing end-to-end web development skills. - Designed a clean, intuitive UI/UX to deliver a polished front-end experience. - Completed the project independently, demonstrating initiative and production-ready execution.	See Live
Crypto Guru Tech Stack : React.js, Figma, REST APIs, Postman - Built a crypto dashboard that aggregates real-time market data from external APIs and presents trends through a clean, responsive UI. - Implemented with React, Tailwind CSS, and Chakra UI, showcasing strong front-end engineering and UI/UX design skills. - Deployed on Vercel, demonstrating end-to-end delivery from development to production.	See Live

SKILLS

- **Language** : TypeScript, JavaScript
- **Frontend** : Next.js, React.js, Tailwind CSS, Shadcn UI, Vite
- **Backend** : Nest.js, Node.js, Express.js, REST APIs, GraphQL, Prisma, Zod, Swagger
- **Database** : MongoDB, PostgreSQL, Redis
- **Messaging & Queues** : RabbitMQ
- **DevOps & Architecture** : Docker, Turborepo, CI/CD, Nginx
- **Tools & IDE** : Git, GitHub, VS Code

ACHIEVEMENTS

- SIH (2023) Finalist
- IDE-Boot Camp Winner (2024)
- Dron-Pratimba Winner (2024) - college level hackathon
- Microsoft Imagina Cup Semi-Finalist
